

Ventureprise Launch NSF I-Corps Summer 2017 Cohort

Ventureprise® Launch summer 2017 Cohort will help you explore the commercial possibilities of your ideas or research. The program provides UNC Charlotte, North Carolina Research Campus, Davidson College, Queens University and Johnson C. Smith University faculty and students with infrastructure, commercialization advice, training and modest funding (NSF Awards of \$1,000 - \$3,000 per team) to identify potential customers and prepare for more substantial funding opportunities.

As of summer 2017, a total of 47 teams from UNC Charlotte have been through the program. Some of the teams have gone on to national \$50k NSF I-Corps program and two teams from UNC Charlotte are now at the stage where they have received a NSF AIR-TT Grant (\$200k) and SBIR Phase I and II grants (\$250k & \$750k).

Proposed ideas and technologies must fall into a Science, Technology, Engineering, and Mathematics (STEM) Field. This may include but is not limited to proposed ventures related to physical sciences, life sciences, software, informatics, energy and many others.

Team Formation

Each team will be made of at least one Academic Lead and Entrepreneurial Leads. We welcome teams with multiple Entrepreneurial Leads.

- **Academic Lead:** A faculty member at UNC Charlotte, NCRC, Davidson, Queens or JCSU.
- **Entrepreneurial Lead(s):** An undergraduate or graduate student, post-doctoral researcher, other student or professional staff, with relevant knowledge of the technology and a deep commitment to investigate the commercial landscape surrounding the innovation.

Funding can be used for materials and supplies, prototype development and travel related costs to conferences and customer interviews.

- Funding: Up to \$3,000 eligible upon milestone achievement (Funding spent by 11/1/17)
- National Science Foundation lineage for further funding opportunities

Goals – To provide University innovators and students a way to transition their work into the marketplace:

- By leading teams through a customer discovery process
- By teaching teams commercialization and entrepreneurship concepts
- By assisting teams to move toward a Go/No Go decision on pursuing additional funding opportunities including:

PORTAL Innovation Center

Ventureprise is located in the PORTAL Innovation Center, a contemporary building that offers private sector entrepreneurs and corporations a business-ready location that offers convenient access to all of UNC Charlotte's resources.
